

# **Chandu Priya - Personal Portfolio App UI Design**

## ***Project Overview***

This Project is a modern and responsive Personal Portfolio App UI designed For a Data Analyst and Power BI Developer. The design present my Skills, Projects, Education Career goals, and Contact information in a clean and professional interface.

## ***Project Objective***

The objective of this project is to design a clean, modern, and user-friendly Portfolio application that showcases my Technical Skills, Projects, Education, Career Goals, and Contact information. The design is focused on providing easy navigation And a consistent experience across mobile and desktop devices.

## ***Design Process***

- Research
- Low-Fidelity wireframe
- High-Fidelity UI Design
- Responsive Design
- Interactive Prototype
- Screenshots and Documentation

## ***Tools Used***

- Figma
- UI/UX Design
- Prototyping
- Responsive Design

## ***Portfolio Screens***

- Home
- About Me
- Skills
- Projects
- Experience & Education
- Contact

## ***Design Style***

The design follows a Clean, Minimal, and Professional Visual Style. A light background is used with dark typography for readability and blue accents For important elements. Rounded cards and buttons, simple icons, and clear Navigation are used to create a modern and user-friendly interface.

## ***Responsive Design***

The portfolio UI was designed for both mobile and desktop screen sizes. The layouts, typography, buttons, navigation, and content spacing were adjusted to provide a clear and consistent user experience across different screen sizes.

## ***Interactive Prototype***

An interactive prototype was created in Figma to demonstrate the navigation flow between the main portfolio screens. Users can navigate from Home to About, Skills, Projects, and Contact screens using clickable navigation elements.

## ***Project Deliverables***

- Research and design inspiration
- Low-Fidelity wireframes
- High-Fidelity UI Mockups
- Mobile and Desktop Designs
- Interactive Figma Prototype
- Design Screenshots
- Project Documentation
- GitHub Repository

## ***Conclusion***

This project helped me understand the complete UI/UX Design process, from research and wireframing to high-fidelity design and prototyping. The final portfolio design provides a professional and responsive way to showcase my skills, projects, education, and career goals.
